

Direction for use

Guardian Soap Flakes

Guardian Soap Flakes are produced of palm-kernel oil and coconut oil.

Guardian Soap Flakes do not contain perfume, colour, optical brightener or bleaching agent, and thus they are particularly well suited for furniture.

Guardian recommends you to treat your furniture with the soap flakes 6 times annually.

Dissolve 1 cup of soap flakes (approx. 100 g) in 5 l of water. (50g. for 2½ l of water (approx. 30°C).

Wipe the soap water until all the soap flakes have been dissolved.

Whip the leather with a lightly wrung cloth.

All leather surfaces should be moistened so as to avoid discoloration.

Let the soap water dry into the leather.

After approx. 10 minutes wipe the leather with a firmly wrung cloth (water).

If the soap leaves a matt film, polish with a dry cloth.

On particularly exposed spots the treatment may be repeated.

The same procedure should be used for untreated wood (ash, beech, oak, pine)

Keep out of the reach of children.

Always test the product on a piece that is not visible before use.

We hope you enjoy using Guardian Soap Flakes!
