

Direction for use

Guardian Outdoor Wood Oil

Guardian Outdoor Wood Oil is specially designed for the care and maintenance of untreated or oiled outdoor wood.

Outdoor wood furniture may be exposed to large climate differences (rain, sunlight, varying temperatures, etc.) which greatly affect the wood and form the basis for mould and mildew infestations.

When using Outdoor Wood Oil the wood is effectively protected from desiccation and the risk of mould and mildew infestations is reduced.

Treatment at least 4 times each year is recommended.

Guardian Outdoor Wood Oil is based on vegetable oils, and is applied in the wood's grain direction with a soft lint-free cloth, sponge or brush in an even coat.

Allow the oil to dry for approx. 2 hours, and then wipe away any excess oil with a soft lint-free cloth.

The treatment may be repeated if the wood does not appear saturated after 1 treatment.

Drying time after completed treatment approx. 24 hours.

Do not apply the oil in direct sunlight.

Previously treated or dirty wood should be cleaned with Guardian Precious Wood Cleaner before oil treatment.

Shake before use.

Keep out of the reach of children.

Always test the product on a piece that is not visible before use.

We hope you enjoy using Guardian Outdoor Wood Oil!
