

Direction for use

Guardian Laminate Cleaner

For environmental and safety reasons this product has been manufactured using Carbon Dioxide as a propellant.

Guardian Laminate Cleaner is used to "freshen up" all types of laminated surfaces.

The product cleans and degreases as well as removing many types of stain.

Spray an even coating onto the laminate from a distance of approx. 25 cm/10 inches, and then rub/polish it off with a non-fluff cloth or soft sponge - never use paper towels!

The use of a brush can be an advantage on rough or uneven surfaces.

Guardian Laminate Cleaner quickly produces a beautiful finish.

Keep out of the reach of children.

Always test the product on a piece that is not visible before use.

We hope you enjoy using Guardian Laminate Cleaner!
