

Direction for use

Guardian Gray-Toned Oil

Guardian Gray-Toned Oil is for oiling untreated wood where a grey pigment is desired, or for caring of already gray pigmented oiled wood.

It is waterrepellent and offers wood preservation.

The oil is applied in a smooth and even coat by a non-fluffy rag or sponge following the direction of the grains.

Excess oil, if any, should be removed by a dry rag.

For daily cleaning we recommend wiping off by using a cloth, firmly wrung in clean water.

Do not use spirits, petrol, ammonium chloride, chlorine or any other strong detergents.

If required, use a mild solution of soap for cleaning the furniture once a month.

The furniture is to be treated 3-4 times each year, or as required (when the furniture dries out and loses its water-repellent facility).

Can be touched after about 2 hours.

Dried through after about 10 hours.

Used rags and sponges should be burnt after use/or kept in an airtight bag in order to keep it from catching fire by spontaneous combustion.

Shake before use.

Keep out of the reach of children.

Always test the product on a piece that is not visible before use.

We hope you enjoy using Guardian Gray-Toned Oil!
